

**“Hmmm”**. That’s kinda our unofficial slogan around here at CFgear. Fact is, we put our noggins on overload in effort to engineer custom flash drive technology that helps teachers *teach* and students *learn*...all in the most feasible, easy-as-pie manner possible.

To date, we’ve collaborated with K12 environments across America to produce intelligently preloaded flash drives that help put **everything a student and teacher needs to be successful right at their fingertips**. Here’s a few ways some schools are leveraging the power of customized, preloaded flash drives...

- 1) **Fundraising** – student council/band/other school groups are selling school branded flash drives to students, parents
- 2) **“Green”, Paperless Classrooms** – class curriculum/handouts are preloaded on flash drives
- 3) **Digital Handbooks** – student handbooks/policies/rules are preloaded on flash drives
- 4) **Event Calendars** – school calendars are preloaded on flash drives
- 5) **Resources/Hyperlinks** – links to websites offering additional research for class projects are preloaded on flash drives
- 6) **Annuals** – pictures, videos, music from students/school are preloaded on flash drives
- 7) **Emergency Contact Info** – Administration and other area contacts preloaded on flash drives
- 8) **Any Digital Content You Can Dream!!!** – you dream it, we’ll build it. Really!

**CFgear.com is a South Dakota-based technology company passionate about putting technology to work in K12 classrooms**...specifically flash drive technology. Our expert team of solutions directors and engineers collaborates with you to produce a truly customized flash drive solution that adds value to your school and most importantly the education process.
